Notice to Mechatronics Students who wish to apply to the GIST Global Intern Program for Summer 2016 at the Gwangju Institute of Science and Technology (GIST), Korea

This internship program is not acceptable for ME 300 according to our criteria. Regarding ME 400, you can get satisfactory grade provided that you are doing Mechatronics minor and perform the below tasks at the research lab:

- Description and analysis of at least two of the typical projects completed in the lab.
- An assessment of the methods adopted by the lab in receiving projects and delivering the outputs.
- A detailed explanation of the contribution of the student to one of the projects during the summer practice (detailed calculations and drawings should be included in the appendix).
- Assessment of quality assurance and control systems used in the lab.
- Usage of software in management and technical aspects of the projects. Hardware and software used by the lab, and the level of automation in the lab should be described.
- Cost analysis of at least one of the projects carried out by the lab.
- An overview of the projects and the department, in conjunction with the position of the university in the domestic and foreign universities.
- An assessment of future research projects.
